parameterizing function Yes automatic scanning and detection of PQ devices in the network Yes querying and storing of PQDIF files with IEC 61850 Yes querying and storing of PQDIF files from hard disk No querying and storing of fault records via IEC 61850 Yes querying and storing of fault records via FTP Yes querying and storing of fault records via SIPROTEC 4 service Yes evaluation of fault records Yes fault location (with regard to fault records) No parameterization of PQ devices No automatic reading in of PQDIF files (from third-party devices) Yes forwarding of operating data (messages, measured values) to Yes time synchronization for connected devices Yes time synchronization / of the graphics card 1 280 pixel vertical image resolution / of the graphics card 1 024 pixel Requirements number of colors / of the graphics card 65 536	project planning function	Yes
automatic scanning and detection of PQ devices in the network Yes querying and storing of PQDIF files with IEC 61850 Yes querying/read-in of PQDIF files mant disk No querying and storing of fault records via IEC 61850 Yes querying and storing of fault records via IEC 61850 Yes querying and storing of fault records via SIPROTEC 4 service Yes querying and storing of fault records Yes evaluation of fault records Yes fault location (with regard to fault records) No parameterization of PQ devices No automatic reading in of PQDIF files (from third-party devices) Yes forwarding of operating data (messages, measured values) to Yes forwarding of operating data (messages, measured values) to Yes forwarding of operating data (messages, measured values) to Yes time synchronization for connected devices Yes Display and operation 1 280 pixel horizontal image resolution	evaluation function	Yes
querying and storing of PQDIF files with IEC 61850 Yes querying and storing of fault records via IEC 61850 Yes querying and storing of fault records via IEC 61850 Yes querying and storing of fault records via FTP Yes querying and storing of fault records via SIPROTEC 4 service interface Yes evaluation of fault records Yes fault location (with regard to fault records) No parameterization of PQ devices No automatic reading in of PQDIF files (from third-party devices) Yes forwarding of operating data (messages, measured values) to control centers via telecontrol protocols Yes time synchronization for connected devices Yes Display and operation 1 280 pixel horizontal image resolution / of the graphics card 1 024 pixel Requirements number of colors / of the graphics card 65 536	parameterizing function	Yes
querying/read-in of PQDIF files from hard disk No querying and storing of fault records via IEC 61850 Yes querying and storing of fault records via FTP Yes querying and storing of fault records via SIPROTEC 4 service interface Yes evaluation of fault records Yes fault location (with regard to fault records) No parameterization of PQ devices No automatic reading in of PQDIF files (from third-party devices) Yes forwarding of operating data (messages, measured values) to control centers via telecontrol protocols Yes time synchronization for connected devices Yes Display and operation 1 280 pixel horizontal image resolution / of the graphics card 1 024 pixel Requirements number of colors / of the graphics card 65 536	automatic scanning and detection of PQ devices in the network	Yes
querying and storing of fault records via IEC 61850 Yes querying and storing of fault records via FTP Yes querying and storing of fault records via SIPROTEC 4 service Yes evaluation of fault records Yes fault location (with regard to fault records) No parameterization of PQ devices No automatic reading in of PQDIF files (from third-party devices) Yes forwarding of operating data (messages, measured values) to Yes forwarding of operating data (messages, measured values) to Yes forwarding of operating data (messages, measured values) to Yes forwarding of operating data (messages, measured values) to Yes control centers via telecontrol protocols Yes time synchronization for connected devices Yes Display and operation 1 280 pixel vertical image resolution / of the graphics card 1 024 pixel Requirements 65 536	querying and storing of PQDIF files with IEC 61850	Yes
querying and storing of fault records via FTP Yes querying and storing of fault records via SIPROTEC 4 service interface Yes evaluation of fault records Yes fault location (with regard to fault records) No parameterization of PQ devices No automatic reading in of PQDIF files (from third-party devices) Yes forwarding of operating data (messages, measured values) to Yes HMI SICAM SCC, forwarding with SIMATIC WinCC Yes forwarding of operating data (messages, measured values) to Yes control centers via telecontrol protocols Yes Display and operation Yes horizontal image resolution / of the graphics card 1 280 pixel vertical image resolution / of the graphics card 1 024 pixel Requirements number of colors / of the graphics card 65 536	querying/read-in of PQDIF files from hard disk	No
interface Yes querying and storing of fault records via SIPROTEC 4 service interface Yes evaluation of fault records Yes fault location (with regard to fault records) No parameterization of PQ devices No automatic reading in of PQDIF files (from third-party devices) Yes forwarding of operating data (messages, measured values) to Yes forwarding of operating data (messages, measured values) to Yes forwarding of operating data (messages, measured values) to Yes forwarding of operating data (messages, measured values) to Yes forwarding of operating data (messages, measured values) to Yes forwarding of operating data (messages, measured values) to Yes control centers via telecontrol protocols Yes time synchronization for connected devices Yes Display and operation 1 280 pixel vertical image resolution / of the graphics card 1 024 pixel Requirements number of colors / of the graphics card 65 536	querying and storing of fault records via IEC 61850	Yes
interface evaluation of fault records Yes fault location (with regard to fault records) No parameterization of PQ devices No automatic reading in of PQDIF files (from third-party devices) Yes forwarding of operating data (messages, measured values) to Yes HMI SICAM SCC, forwarding with SIMATIC WinCC Yes forwarding of operating data (messages, measured values) to Yes forwarding of operating data (messages, measured values) to Yes forwarding of operating data (messages, measured values) to Yes forwarding of operating data (messages, measured values) to Yes forwarding of operating data (messages, measured values) to Yes forwarding of operating data (messages, measured values) to Yes control centers via telecontrol protocols Yes time synchronization for connected devices Yes Display and operation 1 280 pixel vertical image resolution / of the graphics card 1 024 pixel requirements number of colors / of the graphics card 65 536	querying and storing of fault records via FTP	Yes
fault location (with regard to fault records) No parameterization of PQ devices No automatic reading in of PQDIF files (from third-party devices) Yes forwarding of operating data (messages, measured values) to HMI SICAM SCC, forwarding with SIMATIC WinCC Yes forwarding of operating data (messages, measured values) to control centers via telecontrol protocols Yes time synchronization for connected devices Yes Display and operation 1 280 pixel vertical image resolution / of the graphics card 1 024 pixel Requirements 65 536		Yes
parameterization of PQ devices No automatic reading in of PQDIF files (from third-party devices) Yes forwarding of operating data (messages, measured values) to Yes HMI SICAM SCC, forwarding with SIMATIC WinCC Yes forwarding of operating data (messages, measured values) to Yes forwarding of operating data (messages, measured values) to Yes forwarding of operating data (messages, measured values) to Yes time synchronization for connected devices Yes Display and operation Yes horizontal image resolution / of the graphics card 1 280 pixel vertical image resolution / of the graphics card 1 024 pixel Requirements 65 536	evaluation of fault records	Yes
automatic reading in of PQDIF files (from third-party devices) Yes forwarding of operating data (messages, measured values) to Yes HMI SICAM SCC, forwarding with SIMATIC WinCC Yes forwarding of operating data (messages, measured values) to Yes forwarding of operating data (messages, measured values) to Yes forwarding of operating data (messages, measured values) to Yes forwarding of operating data (messages, measured values) to Yes control centers via telecontrol protocols Yes time synchronization for connected devices Yes Display and operation Yes horizontal image resolution / of the graphics card 1 280 pixel vertical image resolution / of the graphics card 1 024 pixel Requirements 65 536	fault location (with regard to fault records)	No
forwarding of operating data (messages, measured values) to HMI SICAM SCC, forwarding with SIMATIC WinCC Yes forwarding of operating data (messages, measured values) to control centers via telecontrol protocols Yes time synchronization for connected devices Yes Display and operation Yes horizontal image resolution / of the graphics card 1 280 pixel vertical image resolution / of the graphics card 1 024 pixel Requirements 65 536	parameterization of PQ devices	No
HMI SICAM SCC, forwarding with SIMATIC WinCC Yes forwarding of operating data (messages, measured values) to control centers via telecontrol protocols Yes time synchronization for connected devices Yes Display and operation Yes horizontal image resolution / of the graphics card 1 280 pixel vertical image resolution / of the graphics card 1 024 pixel Requirements 65 536	automatic reading in of PQDIF files (from third-party devices)	Yes
control centers via telecontrol protocols time synchronization for connected devices Yes Display and operation horizontal image resolution / of the graphics card 1 280 pixel vertical image resolution / of the graphics card 1 024 pixel Requirements 65 536		Yes
Display and operation 1 280 pixel horizontal image resolution / of the graphics card 1 280 pixel vertical image resolution / of the graphics card 1 024 pixel Requirements 65 536		Yes
horizontal image resolution / of the graphics card 1 280 pixel vertical image resolution / of the graphics card 1 024 pixel Requirements 1 024 pixel number of colors / of the graphics card 65 536	time synchronization for connected devices	Yes
vertical image resolution / of the graphics card 1 024 pixel Requirements 1024 pixel number of colors / of the graphics card 65 536	Display and operation	
Requirements number of colors / of the graphics card 65 536	horizontal image resolution / of the graphics card	1 280 pixel
number of colors / of the graphics card 65 536	vertical image resolution / of the graphics card	1 024 pixel
	Requirements	·
design of the drive/storage medium / required / DVD drive No	number of colors / of the graphics card	65 536
	design of the drive/storage medium / required / DVD drive	No

operating system / usable / Windows 7	Yes	
operating system / usable / Windows 10	Yes	
operating system / usable / Windows 2012 Server	Yes	
operating system / usable / Windows 2016 Server	Yes	
operating system / usable / Windows Server 2019	Yes	
processor clock frequency / minimum	2 GHz	
storage capacity / on hard disk / required	100 Gbyte	
storage capacity / of the main memory or RAM / minimum	16 Gbyte	
Cybersecurity		
type of access control / role-based access control (RBAC)	Yes	
product function / firmware identifier	Yes	
cyber security / secure communication	Yes	
cyber security / data integrity	Yes	
Time synchronization		
type of time synchronization	SNTP	
Further information		
Siemens has decided to exit the Russian market (see here).		
https://press.siemens.com/global/en/pressrelease/siemens-wind-down-russian-business		
Siemens is working on the renewal of the current EAC certificates. Please contact your local Siemens office on the status of validity of the EAC certification if you intend to import or offer to supply these products to an		
EAC relevant market (other than the sanctioned EAEU member states Russia or Belarus).
